STANDARD FEATURES

- 50°C rated radiator
- Powder coated finish
- External fuel tank connections
- EVAC service points
- 110% bunded skid base
- All moving parts are fitted with safety guards
- Fitted sockets RCD protectors:
 2 x 1Ph 15amp 3 pin
 2 x 3Ph 32amp 5 pin
 1 x 3Ph 63amp 5 pin
- IP65 electrical boxes
- IP66 electrical outlets
- Rated lifting lugs
- Emergency E stop
- State of the art control system
- Remote monitoring
- Door safety interlocks

ASSEMBLY

The engine and alternator are closed coupled by means of an SAE flange. A full torsional analysis has been carried out to guarantee no harmful vibration will occur. Anti-vibration pads are affixed between engine alternator feet and base frame. Rubber diagonal isolators are specifically designed to reduce engine and alternator vibration and prevent distortion in the voltage

and harmonic output of the generator. All iron and steel surfaces of the canopy fabrication have been sand blasted and then powder coated, which provides an excellent corrosion resistant surface.

CONTROL SYSTEM

The DSE6020 is an Auto Mains Failure Control Module suitable for a wide variety of single, diesel or gas, genset applications. Monitoring speed, frequency, voltage, current, oil pressure, coolant temperature

and fuel level, the module will display warnings, shutdown and engine status information on the back-lit LCD screen and illuminated LED.

QUALITY STANDARDS

Our generator sets are compliant with all the main standards, such as ISO8528, ISO14000, GB755, BS5000, VDE0530, ISO3046, IEC34-1, AS3000.

WARRANTY POLICY

12 months, 1200 hours as per generator. Generators Australia Pty Ltd Warranty Policy.
